Cathy,

Please don't bother with this summary if you don't have the time. It is not important – just an FYI.

Important points

1. The official announcement for the public meeting/notice is tied to the RAD Discharge issue. No known time of resolution.
2. SELC has already requested an extension – before the public meeting/notice has been officially issued. Emy "group" forwarded the SELC letter and attachments after the meeting.
3. DOE hopes to share the EMDF pre-meeting video (to be posted on the new EMDF webpage) with the group later this week.

Discussion points

1. Adler said that there is a "Day for Day Slip" on the Fact Sheet finalization and Public meeting announcement.
 2. SELC letter was discussed. Pat Flood said that the EIT has made a decision to move forward using the existing PP and the three Fact Sheets. No new PP will be issued.
 3. Ben Williams was not on call so the status of the EMDF-related webpage and video is generally unknown. DOE hopes to share more info in next few days.
 4. Webpage will not go "live" until all three Fact Sheets are finalized (and can be posted).
 5. Looking at calendar and "Use or Lose" – no public meeting likely in November. December now possible.
 6. Tonya asked who is giving the presentation(s) and where will they be located? Use video or go live? Will there be video on the webpage to prep for the public meeting? DOE response was the meeting will be live but everything else has to be worked out.
 7. Tonya asked if multiple meetings are planned and DOE response was "that could happen."
 8. Tonya asked if a video for each Fact Sheet will be presented or just one video and the DOE expects one video.
- End of call
